**DETAILED ACTION**

1. This office action is in response to applicants' communication filed on November 23, 2005. Amendments to claims 13, 37, 69-71 and 73-75 and cancellation of claims 46-67 have been entered. Claims 1-16, 18-22, 25-40, 42, 45 and 54-75 are pending in the application. Claims 69-71 and 73-75 are subject to election/species as discussed below. The election/species are stated below.

*Election/Restrictions*

2. The present invention in view of the amended claims 69-71 and 73-75 contains claims directed to the following patentably distinct species of the claimed elected invention:

The following claims are directed to different species of the generic feature of utility function as discussed below.

Specie 1A      Claims 69 and 73

Specie 1B      Claims 70 and 74

Specie 1C      Claims 71 and 75

3. Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, claims 68 and 72 are generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

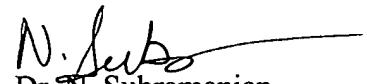

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.
